

**New Delhi: Dated 21<sup>st</sup> October 2026**

The Bharat 6G Alliance (B6GA) and the 6G Industry Forum (6GIF) announced the signing of a Memorandum of Understanding (MoU) to advance collaboration in 5G Advanced and 6G technologies. Both parties exchanged MOU on 8<sup>th</sup> October 2026 during inauguration of 3<sup>rd</sup> International Bharat6G Symposium 2026 by Hon'ble Union Minister of Communications, Government of India.

The Bharat 6G Alliance (B6GA) aims to enable India to emerge as a leading global supplier of intellectual property (IP), products, and solutions in affordable 5G, 6G, and other future-generation telecommunications technologies, while strengthening Indian participation and leadership in international standards development organisations.

Working closely with its members, industry, academia, research institutions, other stakeholders, and the Government, B6GA seeks to strengthen the indigenous telecom ecosystem across the innovation and commercialisation value chain. Its activities span research, design, prototyping, product development, proof-of-concept (PoC) testing, intellectual property rights (IPR) creation, field trials, security evaluation, certification, and manufacturing of telecom products and end-to-end solutions, including innovative use cases and pilots.

6GIF is working to position Taiwan as a global leader in the development and rollout of 6G technologies, fostering international exchange and collaboration. B6GA, for its part, seeks to strengthen India's leadership in the 5G Advanced and 6G era by promoting indigenous innovation, the development of new technologies and use cases, and the growth of India's ICT industry.

By leveraging their synergies, both parties will analyze the potential for applying 5G Advanced and 6G technologies to industrial communications. Activities outlined in the MoU include joint marketing and promotional initiatives, as well as the exchange of information and publications.

#### **About Bharat 6G Alliance**

The Bharat 6G Alliance is a non-profit society facilitated by the Government of India, bringing together domestic industry, academia, research institutions, standards organisations, and telecom service providers. Aligned with the Bharat 6G Vision, B6GA works to advance the design, development, testing, and deployment of intelligent, secure, and affordable 5G/6G solutions. It promotes collaboration across the telecom ecosystem, creation of intellectual property, Indian participation in international standards development, and India's emergence as a leading global supplier of next-generation telecom technologies.

#### **About 6G Industry Forum**

6G Industry Forum was launched in 2026, under the leadership of the TAICS (Taiwan Association of Information and Communication Standards). It brings together domestic companies, academic institutions, research organizations, and standardization bodies to promote research and development, standardization, and implementation of 6G technologies.
